

HANDI-RAMP WHEELCHAIR LIFTS

Handi-Ramp®

HPL 50" AND HPL 72" WHEELCHAIR LIFTS™

Handi-Ramps HPL-50 and HPL-72 Wheelchair Lifts are easy to operate, simple to install and virtually maintenance free. Every safety detail has been carefully designed into these lifts including a non-slip platform, constant pressure switches, a low platform for easy roll-on/roll-off, safety barrier and railing, and rolled edges.

With maximum lift heights of either 50 inches or 72 inches available, they are sturdy enough to lift and lower up to 500 pounds and will accommodate electric wheelchairs and scooters. Running on a gear box and chain, these wheelchair lifts provide a smooth and quiet up and down ride, requiring little maintenance.

Handi-Ramps HPL-50 and HPL-72 Wheelchair Lifts are shipped fully assembled and install in 6 easy steps.

- Safety Pan
- Solid Side Panels

The PL-50 was built to fit and use in almost any residential situation and condition. Using common household current, the drive system operates in all weather conditions, from -30 degrees to +120 degrees. With a key-operated, constant pressure switch, this lift enables you to start, stop and change directions at any point. The electrical system is placed well above ground and sealed against moisture, and the lift is finished with a powder coated finish, to help protect it against the elements.

Compared against the competition, the PL-50 is one tough, safe, affordable lift. You will not find a better built product on the market for your money.
