 g. Edge of threshold to door? _____

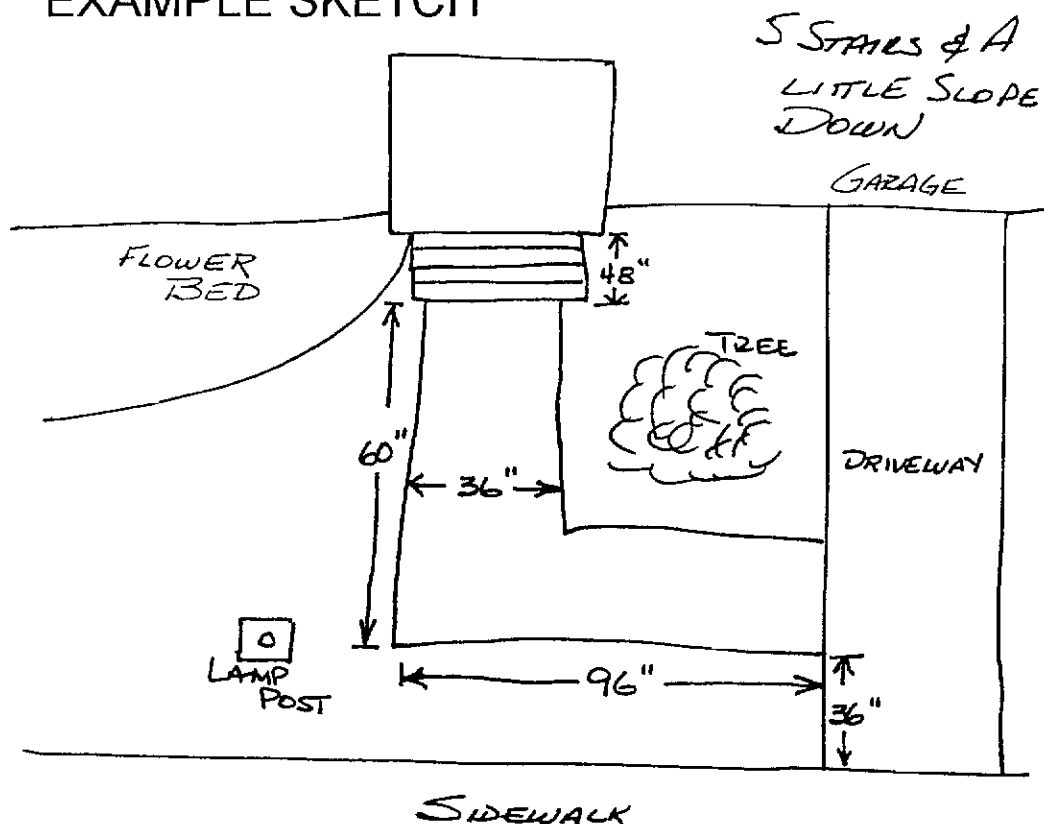

- h. Width of the door opening? _____
 i. Porch Width? _____
 j. Width of stair? _____
 k. Left side of porch/landing to edge of door? _____

- L. Total rise (slope) of yard/walkway/driveway
 where ramp will be positioned? _____

EXAMPLE SKETCH

EXAMPLE -

Here is an example of a simple overhead sketch that we need of the area where you want ramp access. Please include building, doorway, steps, side-walk, driveway or street and any obstacles such as trees, mounds, fences or flower beds. Include sidewalk and building dimensions that would help in showing where the ramp would best be placed. Additionally, please include a non-returnable photograph of the area if possible.

Other information or dimensions that may be of help:
